## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwasaki et al (US. PAT. NO. 5,704,837 hereinafter Iwasaki) in view of Yamamoto et al (US.PAT. NO. 5,755,620).

As to claims 1, 7, Iwasaki discloses a three-dimensional image processing system, including an image processing apparatus (40 in Fig. 1) connected to a display (CRT) to generate image data for displaying an object existing in a three-dimensional space on the display according to a program, and an operating device (steering levels 12, 14) including an operating member having a base end rotatably supported and a free end operable by an operator, so that the image data is varies in accordance with movement of the operating member, wherein the operating device includes an inclination amount data output means which detects an inclination amount of the operating member to output inclination amount data (col. 3, line 10 to col. 4, line 6, col. 9), the image processing apparatus comprising a direction determining means which determines a moving direction of the object in the three-dimensional space based on the inclination amount data (col. 3, line 33 to col. 4, line 6, col. 10, lines 16-65), moving amount

Application/Control Number: 09/686,761

Art Unit: 2674

determining means which determines a moving amount of the object (co. 4, lines 30-40), a position determining means which determining a position of the object in the three-dimensional space in accordance with the moving direction and the moving amount (col. 4, lines 8-12, col. 12, lines 47-51) and an image data output means which outputs image data for displaying the object one the display at a position controlled by the position determining means (col. 4, lines 14-17).

Iwasaki does not explicitly disclose that the moving amount of the object is determined within one frame on the display. Yamamoto teaches that the moving amount of the object in a three-dimensional space on the display is determined within one display frame (Fig. 22 and col. 14, lines 48-66). Thus it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the moving amount determining means of Iwasaki to determine the moving amount of the object within one frame on the display as taught by Yamamoto so as to provide accurate and adequate control behavior of the display object in the three-dimensional space.

As to claims 2, 8, Iwasaki discloses first calculating circuitry, moving amount store, comparing circuitry, moving amount varying circuitry (image synthesizing unit 200; col. 13, lines 26-57; col. 14, line 40 to col. 15, line 16).

As to claims 3-6, 9-11, Iwasaki discloses the claimed features regarding the moving amount and moving direction at col. 10, line 34- col. 11, line 27.

As to claim 12, Iwasaki discloses the claimed features of calculating the inclination direction and determining the moving direction based on the inclination direction and a camera angle (view angle, see col. 14, lines 1-67).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Regina Liang whose telephone number is (703) 305-4719. The examiner can normally be reached on Monday-Friday from 9AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (703) 305-4709. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
